

All State Taxes* per \$1000 of Personal Income 2017

The state's taxes per \$1,000 of each tax filer's effective tax rate would remain almost \$7 below the national average.

Effective Tax Rate is defined as the average rate at which earned income is taxed that is total federal income tax after deductions.

Colorado would move to **39th** in taxes as a portion of personal income, up from **46th**.

*Includes all state and local taxes
