Economic & Revenue Forecast

Presentation to the Joint Budget Committee
December 18, 2020
Economic Outlook
We’ve learned a lot since May…

Real U.S. Gross Domestic Product

*Dollars in Trillions*

Real GDP is inflation-adjusted to chained 2012 levels and shown at seasonally adjusted annualized rates.
Economic activity rebounded faster than expected in May, when the current year budget was set

Real U.S. Gross Domestic Product

Dollars in Trillions

Source: U.S. Bureau of Economic Analysis and Legislative Council Staff May and December 2020 projections. Real GDP is inflation-adjusted to chained 2012 levels and shown at seasonally adjusted annualized rates.
The “K-shaped” nature of the pandemic explains some of the higher than expected state revenue growth

Real U.S. Gross Domestic Product

*Dollars in Trillions*

Many industries have rebounded to pre-recessionary levels of activity

Those most impacted by the pandemic continue to suffer, including low-wage service workers; travel, tourism, leisure and hospitality, and oil and gas industries

Source: U.S. Bureau of Economic Analysis and Legislative Council Staff May and December 2020 projections. Real GDP is inflation-adjusted to chained 2012 levels and shown at seasonally adjusted annualized rates.
Retail sales were boosted above pre-pandemic levels with shifts to in-home consumption

Monthly U.S. Retail Sales
Dollars in Billions

Retail sales were boosted above pre-pandemic levels with shifts to in-home consumption

Colorado Retail Sales Relative to January 2020 Levels
Index January 2020 = 100

Source: Colorado Department of Revenue.
As of October, Colorado had regained 63 percent of jobs lost since the pandemic began.

While high-wage employment is at pre-recessionary levels, low-wage workers remain severely impacted.

Percent change in Colorado employment since January 2020:

- **-0.2%** High Wage (>$60K)
- **-5.8%** Middle Wage ($27K-$60K)
- **-17.6%** Low Wage (<$27K)

Federal stimulus supported economic activity by more than offsetting wage losses and boosting consumption.

Inflation is calculated as the growth in urban area prices in a given period relative to the same period in the prior year.

*Headline inflation includes all products and services. **Core inflation excludes food and energy prices.
Reduced travel activity continues to keep downward pressure on oil prices and new exploration in Colorado and nationally.

Source: Energy Information Administration and Baker Hughes.
Outlook Summary

• The economic recovery continues to outpace expectations, yet softening at the end of the year with the rise in COVID-19 cases poses near-term downside risks
• While many households and businesses have recovered, others continue to be hit hard in this K-shaped recovery
• Vaccine distribution heightened optimism and is expected to boost economic activity starting in the second half of 2021
• Consistent with past recessions, labor markets will lag recovery in other parts of the economy
• Inflationary pressures will remain subdued as low energy prices, low global demand offset global supply constraints
Risks to the Forecast

Downside

• Weakening with the resurgence of COVID-19
• Pullback in consumption and investment as stimulus ends
• Long-term damage from the pandemic ("scarring")

Upside

• COVID-19 vaccines
• Additional federal stimulus
• Structural shifts resulting in innovations
General Fund Budget Outlook
General Fund collections were increased on higher than expected collections to date, vaccine distribution.

Gross General Fund Revenue

Billions of Dollars
Percentages show year-over-year changes

Change Relative to September
FY 2020-21: +$775.7 million
FY 2021-22: +$590.9 million
FY 2022-23: +$498.8 million

Source: Colorado Office of the State Controller and Legislative Council Staff December 2020 forecast.
Revenue expectations have increased considerably as data have become available and suggested a much stronger economic landscape than imagined in May.

Gross General Fund Revenue

Billions of Dollars

Percentages show year-over-year changes

Source: Colorado Office of the State Controller and Legislative Council Staff December and May 2020 forecasts.
The 2020 regular income tax filing season will show the impact of the COVID recession. However, these collections won’t start to come in until at least February 2020.

**Share of General Fund Revenue**

- **Individual**: 60.7%
- **Corporate**: 6.8%
- **Sales & Use**: 27.1%
- **All Other**: 5.5%

**Risks to the Income Tax Forecast**

- Economic uncertainty
- Delayed filing deadlines
- Unemployment insurance benefits
- State and federal policy changes

*Source: Colorado Office of the State Controller and Legislative Council Staff calculations.*

*Based on FY 2018-19 collections. Income taxes net of the State Education Fund diversion.*
Projections for FY 2020-21 are still based on limited data

</tr>
</tbody>
</table>

Changes across forecasts:

- **Beginning balance:** +$1.8 billion carried over from FY 2019-20
- **Revenue expectations** increased considerably on higher 2019 collections and increased economic expectations
- **Net transfers** reduced with budget balancing legislation
- **Net transfers and appropriations** subsequently increased with special session legislation, November election outcomes

Source: Legislative Council Staff forecasts based on current law. See Table 2 in the December 2020 forecast for more information.
Next Year | FY 2021-22 Budget Outlook

Additional revenue available to spend or save above FY 2020-21 spending levels. Amounts hold FY 2020-21 appropriations constant and incorporate the revenue forecast, current law transfers, rebates and expenditures, and the 2.86% reserve requirement.

Amounts do not account for caseload growth, inflationary, or other budgetary pressures

Other considerations
• Any changes made to FY 2020-21 budget will impact this amount
• Elevated uncertainty
• CARES Act CRF moneys no longer available

Source: Legislative Council Staff forecasts.
General Fund Budget  (Spending or Saving)

Dollars in Billions

Source: Legislative Council Staff December 2020 forecast and current law.
Risks to the Forecast

New Information

• Five months of FY 2020-21 collections reflecting stronger than expected economic fundamentals
• COVID-19 vaccines in distribution

Unknowns

• Extent of economic damage and its lasting effects (“scarring”)
• Impacts of coming off of the federal stimulus; Additional stimulus?
• Influence of the recession and policy changes on 2020 income taxes

Downside risk: Further weakening with the rise in COVID-19 cases, long-term damage (“scarring”) from the pandemic

Upside risk: Additional stimulus, resiliency and innovation

**Total Decline in Enrollment in 2020-21:**

22,280 FTE

*Source: Colorado Department of Education October count.*
2020-21 School Year Change in Enrollment

Source: Colorado Department of Education October Count.
Enrollment Forecast Assumptions

• Students not enrolled in public school this year were either:
  o Homeschooled
  o In learning-pods
  o In private school
  o Held back (mostly for kindergarten)

• Most school districts will return to in-person learning for the 2021-22 school year

• Most students will return to their prior school districts next year

• Longer-term pressures on enrollment remain (lower birth rates, housing affordability issues, slowing net in-migration)

Total K-12 Enrollment

Source: Colorado Department of Education and Legislative Council Staff December 2020 forecast.
Risks to the K-12 Enrollment Forecast

• Uncertainty around vaccine roll out timelines

• Stickiness of current alternative education choices

• “Redshirt” kindergarteners: enroll in K or move to 1st?

• Relocation of families for employment, health concerns, or housing affordability
Assessed Valuation Forecast
2021 is a reassessment year

- **Residential, commercial, and industrial** actual values as of June 30, 2020
  - Assessors may not consider changes to market conditions after the assessment date
  - Next reassessment in 2023, based on values as of June 30, 2022

- **Natural resource** production for calendar year 2020

- **Gallagher Amendment** would have required a new residential assessment rate to be set for the 2021-2022 reassessment cycle this session

School Finance Outlook
School Finance Basics

- **Funded Pupil Count** is the statutory student count metric used to allocate funding.

- **State Aid** = **Total Program** - **Local Share**.

- General Assembly sets the **Budget Stabilization Factor** to establish Total Program and State Aid.

- General Assembly balances contributions to State Aid from **General Fund** and **State Education Fund**.
Change in Expectations for FY 2020-21 School Finance Funding

Dollars in Millions

Current Law Appropriation*

<table>
<thead>
<tr>
<th>BS Factor: $1,173 million</th>
</tr>
</thead>
</table>

December 2020 Expectations

*Current Law appropriation uses December 2019 forecast.

The General Assembly’s Choices Range From:

- Hold at $1,173 million
- Reduce to $1,090 million

[Graphs showing state aid and local share changes]
Year-over-Year Change in School Finance Funding
FY 2020-21 to FY 2021-22
Dollars in Millions

Source: Legislative Council Staff December 2020 forecast.
*Assumes a constant Budget Stabilization Factor.
Implications for Balancing General Fund (GF) and State Education Fund (SEF) Contributions in 2021-22

• $83M reduced obligation in 2020-21; $107M increase in state aid requirement in 2021-22 year-over-year.

• In 2020-21, could decrease GF or SEF spending by $83M or reduce BS Factor or some combination.

• In 2021-22, Governor’s request reduces BS Factor to $572.4 million and requires SEF ending balance of $140 million.

• Request implies one-time spending increase of $522 million from SEF; $139 million increase in GF appropriation.

• SEF expenditure can’t be sustained. GF appropriation will increase by $512 million in 2022-23 in this scenario to maintain the BS Factor at current levels.
Adult Corrections Population Forecast
The prison population is down 16.4 percent since February.
Case filings and commitments are down

Case Filings Trends
FY 2016-17: +12.0 percent
FY 2017-18: +5.6 percent
FY 2018-19: +1.7 percent
FY 2019-20: -8.6 percent
FY 2020-21: -28.3 percent FYTD

New Court Commitment Trends
FY 2016-17: +11.7 percent
FY 2017-18: +8.3 percent

Forecast uncertainty remains elevated

- This forecast always contains (bidirectional) error
  - Before 2020, current year forecast error averages about 1.7 percent, or 328 inmates
  - Budget year forecast error is about 2.1 percent, or 413 inmates

- Trajectory of COVID-19 pandemic and efforts to contain it is the most important risk to the forecast

- Conflating permanent impacts from behavioral or policy changes from temporary impacts from the pandemic raises the possibility of forecast error
